Python

Class#23

What is our target for today ?

1. Pattern Matching with Regular Expression
2. findall(), search(), split(), sub() method
3. Phone Number validation with RegEx.
4. Email validation with RegEx.

What is our target for today ?

1. Regular Expression
   Regular expressions are patterns used to match character combinations in strings

Special character	Meaning
.	matches any element
^	matches beginning of sequence
$	matches end of sequence
*	zero or more repetitions
+	one or more repetitions

What is our target for today ?

1. findall(), search(), split(), sub() method

```
#findall -> Returns a list containing all matches
#search-> Returns a Match object if there is a match anywhere in the string
#split-> Returns a list where the string has been split at each match
#sub -> Replaces one or many matches with a string
```

What is our target for today ?

split(), sub() method

```
#split-> Returns a list where the string has been split at each match
```

Regular Expression	Description
\d	Any digit, short for [0-9]
\D	A non-digit, short for [^0-9]
\s	A whitespace character, short for [\t\n\x0b\r\f]
\S	A non-whitespace character
\w	A word character, short for [a-zA-Z_0-9]
\W	A non-word character [^\w]
\S+	Several non-whitespace characters
\b	Matches a word boundary where a word character is [a-zA-Z0-9_]
